

WIDE FORMAT BANNERS

Wide format banners are a versatile advertising medium. We can supply in a range of preset and custom sizes, as well as varying thickness fabric materials or PVC and PVC mesh.

Fabric Banners:

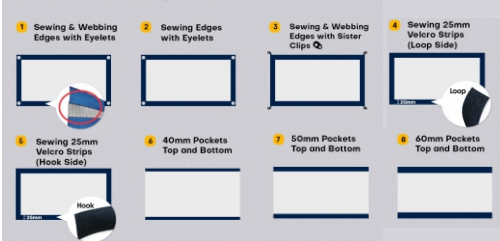

Fabric banners are a great advertising medium and a great alternative to PVC Banners as they are lighter, easier to transport and can be used time and time again.

- The 120gsm is a lightweight but sturdy knitted polyester that lets light through the material whilst still providing a vibrant print. The lightweight material is perfect for the outdoors as it flows freely in the wind.
- The 165gsm Mesh Fabric is perfect for the outdoors as it is a perforated material that allows for breeze to flow freely through the fabric
- The 250gsm is a heavy weight knitted polyester that provides an opaque print that can be seen from a distance, perfect for when only the best will do.

TOP 8 REASONS TO BUY A FABRIC BANNER:

1. They're environmentally friendly, as they are made with biodegradable fabric
2. Once folded the banners take up little room making them easy to store!
3. The metal eyelets make the banners easy to install as they're ready to hang with the addition of zip ties or rope
4. The fabric is machine washable and reusable
5. Unique to any competition (guarantee to stand out)
6. Harder to graffiti or damage (compared to PVC)
7. 50% cheaper than PVC
8. The fabric banners will last longer (compared to PVC) as they are crease and wrinkle free

Banner Finish Options

Finishing Options:

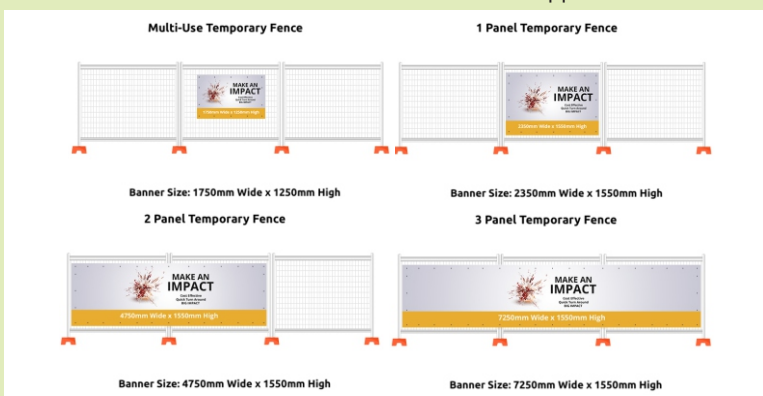

We have 8 different finishing styles to choose from, our most popular is the Sewing & Webbing Edges with Eyelets.

Fabric Banner approx. turnaround time. 10-14 working days from artwork approval.

PVC / PVC Mesh Banners:

- Our high definition PVC Banners are 510gsm with a matt finish. With a high weave density of 1000x1000 and welded edges all the way around, you know you'll be receiving a top quality product. Eyelets are also included in this product and are centred and evenly spaced around the banner.
- Our high definition mesh banners printed with UV Technology are ideal for event signage and sponsorship, temporary fences, and for the construction industry. Weighing in at 280gsm, the mesh banner has a high weave count of 1200x1200, but it's mesh like state allows for air to flow through the banner. Clear eyelets are also included in this product and are placed every 500mm.

PVC / PVC Mesh Banner approx. turnaround time. 3-4 working days from artwork approval.
